

ColorLogic[®] LED Light Niche

SHALLOW NICHE

The PROHAYWARD shallow design SPO600LED Light Niche is built to the same specification of the standard SPO600U DuraNiche but is for use exclusively with Hayward's ColorLogic LED lighting.

PROHAYWARD

The PROHAYWARD Shallow Niche simplifies the installation of Hayward ColorLogic® lighting in pools that have block or poured concrete walls. The shallow niche requires no additional concrete forming around the niche during pool construction.

Unlike other LED lights, ColorLogic features a thermo-conductor pad and a stainless steel back plate enclosed in Hayward's innovative design to divert light-killing heat away from the LEDs and provide maximum performance with a 50,000 hour life. To assure product integrity, the ColorLogic LED light is enclosed in a sealed unit protecting its solid-state circuitry from moisture and eliminating the need to ever service the unit. The light operates with a single on/off switch control and pool owners can select five fixed colors or seven color changing shows. ColorLogic offers the opportunity to set the mood from deep rich dramatic colors, to peaceful slow changing color fades, to an exciting rapid color changing party atmosphere.

With Hayward's ColorLogic LED lighting and the PROHAYWARD shallow niche you have a winning combination from the industry leader - Hayward Pool Products.
